Description

Aimy IndexNow V2.0 Plugin Free Download

Aimy IndexNow notifies search engines about new or updated content of your website automatically. So search engines know about the latest updates of your website immediately. Plugin for Joomla! 3 and 4.

Features:

This Joomla! plugin submits URLs of new or updated content – just in time and automatically on save (or upload for media files).

IndexNow is supported by several search engines, for example Bing and Yandex. We use the central API of indexnow.org to submit new or updated URLs. This way, all search engines that support IndexNow will be informed automatically.

Aimy IndexNow is easy to set up and ready for use in about 2 minutes.

Documentation:

Introduction

Aimy IndexNow automatically informs search engines when new content becomes available on your website or updates have been published - instantly. To achieve this, the plugin uses the IndexNow protocol to submit notifications.

Supported Joomla! Versions

Aimy IndexNow supports Joomla! 3.9 and up as well as Joomla! 4.0 and up.

Installation

The installation of the extension follows the common Joomla! procedures.

In case you are not familiar with these procedures, proceed as follows:

Download the extension's ZIP archive

Log into your Joomla! backend as "Super User"

From the menu, choose "System ? "Install" ? "Extensions"

Click on the "Or browse for file" button and select the ZIP archive
The extension's archive will be uploaded and installed afterwards.

For further information, please have a look at the Joomla! documentation "Installing an Extension".

NOTE: All plugins are disabled by Joomla! when installed for the first time. To enable Aimy IndexNow, proceed and configure the plugin.

Configuration

After a fresh installation, click on the "Configure plugin now" button on the installation report page.

At any time, you can configure the Aimy IndexNow plugin using Joomla!'s Plugin Manager by choosing "System" ? "Manage" ? "Plugins". Locate the plugin and click on its name in the "Plugin Name" column of the plugin listing.

Enabling the Plugin

In order to use the plugin's functionality, you have to enable it first.

To do so, change the plugin's status from "Disabled" to "Enabled" and apply your changes by clicking on either the "Save" or "Save & Close" button in the toolbar.
