Description

Bycon Vector Logo Free Download

During the 2005s a German came to China and brought the most recent German innovation in the diamond core drilling industry. At that point, another China-Germany joint endeavor organization was built up in 2005. Equipped with little more than determination we delivered our first professional core drill rig and core drill motor with German design and technology. As the years passed, we proceeded with the tradition of advancement and technical accomplishments, for example, in the item of core drill, drilling lift, table saw and floor grinder, and so on. Till now, we hold the most professional and complete range of core drill rigs and core drill motors, floor grinders, table saws, etc. We are resolved to build Bycon into a top-notch, Non-stop creative global modern enterprise.
