Description

ChatPion V8.0.8 - Facebook & Instagram Chatbot,eCommerce,SMS/Email & Social Media Marketing Platform (SaaS) Free Download

ChatPion mainly is a visual drag and drop Flow Builder based chatbot for Facebook Messenger and Instagram DM. It also comprises a feature for reply and private reply to comment on Facebook and Instagram. Besides, the marketing application has a feature for posting text, image, video, and carousel on Facebook and Instagram. Moreover, it has a feature for posting on other social media.

True, the marketing software comes up with a complete SMS and Email marketing solution. On the other hand, it has a full-featured Ecommerce platform that could be set up inside Facebook Messenger, Instagram DM, and on web browsers. Ultimately, ChatPion is an open-source self-hosted white label multi-user SaaS application. You can start a software service business with ChatPion Extended License. In one word, it is an all-in-one marketing solution for your business.

On the ChatPion Flow Builder, a visual drag and drop chatbot editor, you can easily build a fully interactive and highly responsive Facebook Messenger and Instagram bot. You can accomplish the entire bot building process on the Flow Builder without moving here and there. Therefore, you can effectively control all the messages, actions, and interactions among them. Looking at the bot on the Flow Builder, you can imagine how the bot will interact with your customers. Therefore, you can build the bot in a way that the bot can attract more and more customers. On the Flow Builder, you can build a condition-based intelligent bot that can take decisions based on users' data and act accordingly. It doesn't send random messages to every people. Instead, it sends the right message to the right people.

The ChatPion Flow Builder is user-friendly and well-designed. You can build a bot on the Flow Builder by dragging and dropping very easily. Simply put, it makes the bot-building process super easy and straightforward.

The application has a social posting feature that can publish and schedule posts on different popular social media, such as Facebook, Instagram, Twitter, and so on. Besides, it has Facebook and Instagram comment growth tools that can comment and reply to comments under posts, send private reply and accomplish some other things on Facebook and Instagram. Also, the application has Email and SMS marketing tool that can send Bulk Emails and SMS to your customers.

Moreover, ChatPion has a full-featured Ecommerce. With the Ecommerce, you can create robust and nice-looking Ecommerce stores that can live inside Facebook Messenger, Instagram DM, and on the web browser. The Ecommerce store can sell products to customers and receive payments via multiple payment methods, including PayPal and Stripe. Of course, you can use the Ecommerce store as the QR code digital menu for your restaurant. Well, after you have created an Ecommerce store, you can easily integrate it with a messenger bot on the Flow Builder. You can also create User Input Flow campaigns on the Flow Builder if you have User Input Flow and Custom fields, a ChatPion Add-on. The User Input Flow can collect data from the users in a conversational way like a human being.

Well, ChatPion has two types of Licenses – Regular License and Extended License. With the Extended License, you can sell the service of the software to your end-users and receive payments from them via different payment methods. Also, you can rebrand the software as your own brand name. That is, you can start a software service business on your own with the Extended License of ChatPion.

ChatPion has a precise and well-organized dashboard. And from the Dashboard, you can navigate to different features easily, especially to the drag and drop Visual Flow Builder.

In conclusion, ChatPion is a complete and comprehensive solution for your business.
