Description

Codebase Bootstrap 4 Admin Dashboard Template & Laravel 6 Starter Kit V3.2

Codebase is the result of hundreds of hours of design and development. It was built with extra care, based on the valuable feedback received over the last few years.
It follows the best practices and uses the latest technologies. It will enable you to build fast, reliable, user friendly web applications and websites that will look great and work seamlessly across various screens and devices. It will be a valuable tool that will help you create the product that will provoke the emotions and credibility you want for your business.

Key Features
HTML & PHPChoose the one that better fits your project's requirements.
Laravel Starter KitBuild your custom Laravel project with the included starter kit! It includes a few page examples and main assets ready to work with Laravel Mix out of the box.
Get Started VersionA production ready version with boilerplate pages is included in the package. It will help you rocket start your project.
