Description

Disable Right Click for Joomla 3.X V1.1

Disable Right Click for Joomla 3.X is a plugin that gives the ability to disable site selecting text or images and copy, completely disable right click and show a custom popup with the HTML message you want. And all these are applied to the user groups that you want. For example you can disable right click only for public, or add custom popup only for registered users.

Features:

Select user groups on which the rules will be applied

Disable text highlighting and copy or not

Disable right click (here you have 4 options)

No (means that you want the default browser menu)

Yes (means that you disable default menu and you can display a popup on right click - see below)

Yes but only for images (means that you disable only for images - nothing is displayed)

Show popup (this occurs when you select "Yes" in the previous select)

Popup title

Popup message (Here you can add HTML code)
