### Description

DJI GO 4 V4.3.37

DJI GO 4 is an app designed to work with all DJI products, especially the firm's latest offerings. In case you aren't aware, DJI is a company that makes some of the best drones and equipment for aerial photography. Some of the products that the DJI GO 4 app supports are Phantom 4, Phantom 4 Pro, Inspire 2, and Mavic Pro. The app offers live image transmission, along with several editing features. Not to mention, live streaming is integrated.

### PROS

- Advanced camera controls
- Real-time high-quality image transmission
- Intuitive user interface
- Fine-tuned camera controls

### CONS

- Firmware updates could cause issues
- Getting a hang of the controls can take time
- Customer support could be better
- No proper instructions manual
