Description

EasyShare V4.3.4.6 is a free-of-charge file-sharing and peer-to-peer platform developed by Vivo Communication Technology Co. Ltd. Not only it is cost-free but, it's also ad-free. Moreover, transferring files can be performed even when you're not connected to an internet connection. No wonder it has garnered more than 200 million users worldwide already.

On top of that, it provides a cross-platform feature which means you will be able to seamlessly send or receive data over Android, iOS, Windows, and Mac without any restriction. EasyShare is a great alternative to SHAREit, Xender, and ShareMe.

Fast and flexible transfers

For the record, EasyShare is prominent for the ultrafast data transferring speed that it offers to its millions of users. The speed rate can be as fast as up to 40 MB per second. Without any limitation implemented to the amount or kind of file you can share, it enables you to send and receive important data from lightweight to heavyweight regardless of its format type.

MP4, AVI, JPEG, APK, and many more, you can freely share all sorts of files you have with any intended recipient. File sharing across various platforms can be done with a single tap. Simply through a wireless LAN or Bluetooth, you can transfer data as much as you like whenever and wherever you need so. No internet connection required, as stated.

In case you upgraded your mobile device, a few streamlined steps can automatically and securely migrate your desired content from your old phone to the brand new one. Thanks to its straightforward user interface, familiarizing yourself with its operation is effortless with no necessary learning curve at all even for beginners. Not only that, it guarantees that no ads will ever interrupt your data sharing.

Send or receive files anytime and anywhere

EasyShare is a handy cross-platform application that lords over the file-sharing market with the first-rate transferring features and functions that it grants to its users. Furthermore, it is totally free and does not have ads that interrupt the process. Seamlessly send or receive data in the lightning fast speed with or without connection no matter what its file size and format type.

PROS

- Transfer all kinds and size of files
- Share data through wireless LAN or Bluetooth
- Transferring speed of up to 40 MB per second
- Ad-free and supports cross-platform sharing

CONS

No sync player feature
Music sharing fails to work at times
