## TESTIMONIALS FROM OUR CUSTOMERS

★★★★★ for **Feature Availability** by **loganrun**

Blown away by how robust this plugin is. While I was configuring it, I kept on waiting for a roadblock I'd have to custom-code, but the developers appeared to have anticipated everything. I've paid for official Woocommerce plugins that were twice the price and only did a fraction of what this can do. Bravo!

★★★★★ for **Customer Support** by **ozwds**

This plugin is one of the best plugins on the market. It is well designed, works out of the box, full of useful features and custom settings. I found it to be very useful.

The support is one of the best as well. They give clear instruction, to the point solution, and the support replies almost instantly.

Great product, fantastic support, 5 out of 5. Highly recommended.

★★★★★ for **Flexibility** by **Websperations**

This is an awesome plugin! I have used it on multiple sites now and was able to accomplish a complex setup that I could only accomplish with custom programming in the past.

Support is outstanding and the quality of product is top notch.

I would use this in a heartbeat without thinking twice.

★★★★★ for **Customizability** by **alansimmonds**

This is one of the best plugins I have ever used. It's uses and applications are limitless and it works beautifully with many different themes. Could not be happier :)

★★★★★ for **Design Quality** by **terryatsm**

I have purchased over 100 plugins & themes and WooCommerce Extra Product Options has to be the best designed & coded plugin I have ever used. My questions have been answered so fast I would swear the developer was waiting on me! Keep up the great work!

★★★★★ for **Feature Availability** by **nopez4you**

Wow! This amazing plugin just saved me countless hours of tedious work. It allowed me to add global pricing options to hundreds of products in just a few minutes. The interface is extremely simple, intuitive and well thought out. If only all plugins were this good!

★★★★★ for **Customer Support** by **big-splash**

Awesome plugin - awesome support. Takes Woocommerce to the next level for flexibility and, quite possibly, the best support I have experienced as a web developer.

## PRODUCT OPTIONS

### Form Builder

Create options globally or per product with a vast variety of features.

### Conditional Logic

Show or hide options based on other option values or variations.

### Math Formula

Control option pricing with math functions based on the price/value of other options, product quantity or the base product price.

### Product Element

You can now have a product selected as an option much like composite or bundle plugins.

### Repeatable Elements

Elements can be repeatable based on the product quantity or manually.

### Template Elements

Increase your productivity by creating template elements and use them on multiple forms.

### Unique Features

Option role restriction. Display sections as a pop up or a slider and much more.

### Transform Variations

Convert the variation attributes dropdowns to radio buttons, image swatches or color swatches.

### Validation Features

Built-in and JavaScript form validation along with server-side verification.

### Control Panel

Manage every aspect of the plugin via an extensive settings panel where most of the features are user suggested.

### Compatibility

We support several well-known 3rd part plugins like WooCommerce Subscriptions and Bookings.

### Translation Ready

Translate the plugin elements and control panel into any language using WPML.

### Customer Support

Always willing to assist and meet the demands of our customers. We are committed to your success!

### 1000+ Average 5-Star Reviews

Respect, Confidence, Consistency. Your success is our mission.

### Free Lifetime Updates

Enjoy frequent free updates for life with new features and improvements.

Create WooCommerce product addons easily! Extra Product Options version 6.4.5 is live and includes a variety of features such as the new dynamic element, weight support, customization of shipping methods based on selected options, enhanced conditional logic that supports multiple groups, support for ACF and JetEngine data shortcodes, pricing with lookup tables, repeaters, template elements, math formula, product elements, conditional logic and much more!

Latest Version 6.4.5 – April 05, 2024 – view changelog

WordPress 6x Ready

WooCommerce 8x Ready

Does the current functionality of your WooCommerce Products meet your needs? Would you like to add Conditional Logic to your forms? Need further Pricing options to grab your shoppers attention? Extra Product Options is the best WordPress Product Plugin you have been searching for.
