Description

FMWhatsApp APK, which is a modified App of the original WhatsApp. This article will highlight the features, pros, and cons.

We are living in a modern world that relies heavily on communication. Generally, with the advent of the smartphone, many messaging apps came into the market. People are using various Apps, but you can call WhatsApp as the king of communication. It allows you to remain ultra-private during every type of messaging. But due to human nature, we want more. That's why developers are creating similar Apps like WhatsApp.

Why should you use FMWhatsApp APK?

As you already know that this App is a modified version of the original WhatsApp. But why should you use it? The answer to this question is simple; for more visual experience and cool features, which are not present in the original App. This App provides freedom of customization, which allows you to personalize the App according to your satisfaction. For example, if you do not like the green layout of the original App, Want WhatsApp Group Links Chek [HERE](#) then you can change it in the modified version. That convenience can result in your aesthetic satisfaction.

The sole purpose of this modified version is to provide more features, user-friendly interface, and desired additions.

What exactly is FMWhatsApp APK?

It is the best-modified version of WhatsApp. And it is developed by Foud Apps (the developer is FoudMakkad). He added a large range of features in the App and presented it to the users. This App is not available on the Google Play store, but you can download it from a third-party website. But you need to be cautious and use an antivirus before downloading the App because third party websites can contain viruses and malware.

Fmwhatsapp is the superb version that allows you to hide your last seen, delivery report, online status, and other interface icons. You enjoy the flexibility of thousands of themes from the library, which has a lot of options to choose from.

Key specifications

The following is the exact information on the FmWhatsApp APK.

The size of the App is 52.02 MB.

The name of the developer is FoudMakkad.

The name of the package is com.FmWhatsApp.

It is the modified version of WhatsApp.

The latest update came on the internet on June 18, 2019.

Features of FMWhatsApp APK

The latest version of this App carries new additions and exclusive features, which we will describe below.

Here are all the categories.

Customization

This App allows the following.

You can replace the green theme of the original App with your desired color and selection from the library.

You are free to add custom themes to your library, which has the capacity to accept thousands of themes.

You can personalize all icons of the App by changing colors and icon graphics.

Privacy

To remain more private, you can do the following.

You can add privacy tweaks to the App, which allows you to hide features like last seen, blue ticks, and double ticks.

You can deactivate the video calling feature, which is not possible in the original App.

You can use the app lock, which allows you to set a password for the App. That's why you can secure your data efficiently.

Exclusive features

The following are the surprising features.

You do not have to save contacts for sending messages. This App allows you to send messages to unsaved contacts.

The original App allows you to pin only three chats, but you can pin 100 chats with this App.

You have the facility to change the colors of the groups, which is absent in the original App.

Security features

The following are the security features.

There is an in-built App lock, which is not present in the original App. You can secure the App by a password.

You can secure conversations by adding pins to the chat.

Increased limits

This App allows you to send messages to a large group containing 500 people. The original App allows only 250 people.

You can send 60 images to one recipient. The original App does not allow that.

Pros of FmWhatsApp APK

The following are the upside of this App.

It has an anti-delete feature, which forbids the recipient to delete your sent messages.

You can choose any theme from the library, which has a collection of more than a thousand themes.

You are allowed to share ten images in one message.

You can share large files up to 700 MB.

The following are some downsides of the App.

The biggest con of this App is privacy. And the developer can view your sent and received messages. This drawback can compromise your security, and developers can spy on you.

The other disadvantage is speed. All functions work slower than the original App.
