Description

FontLab 8 x86 Free Download

FontLab 8 new and updated version for Windows. It is full offline installer standalone setup of FontLab 8 Free Download for compatible version of Windows. Program was checked and installed manually before uploading by our staff, it is fully working version without any problem.

FontLab 8 Free Download Overview

FontLab 8 is an integrated font editor for Mac and Windows that helps you create fonts from start to finish, from a simple design to a complex project, and brings a spark of magic into type design. Try FontLab 8 for free for 10 days, and start making fonts today, Express your imagination, prototype and experiment. Draft glyphs with bitmap autotracing and live calligraphic strokes. ?Draw and edit beautiful, smooth, consistent glyphs in fractional or integer precision, with the help of intelligent snapping and live numeric and visual measurements. Explore new directions with color and variation. Extend and complete any font in FontLab, or in mix with other font editors.

efine your drawings: create overlaps, simplify paths, equalize stems. Scale while keeping stroke thickness, globally adjust weight and width, find & fix imperfections. Build and assemble glyphs from variable components or from self-adjusting segment or corner skins. Add accented glyphs with a simple double-click. ?Space and kern in multi-line tabs or windows that feel like a text editor. Add typographic smartness like ligatures, small caps, old-style numerals with automatically-generated OpenType features, and test them in the integrated state-of-the-art complex-script text engine. Create, open, extend, test and export font families, variable OpenType fonts, color fonts and web fonts for any Unicode writing system. Interchange with other font editing apps like FontForge, RoboFont or Glyphs. Supercharge your workflow with powerful add-ins and Python 3 scripts.

Features of FontLab 8 Free Download

Below are some amazing features you can experience after installation of FontLab 8 please keep in mind features may vary and totally depends if your system supports them.

EXPLORE & PREPARE NEW

Relax your eyes with the new dark or refined light interface theme. Group panels into a vertical infinite, scrollable panel dock, and intuitively navigate between the panels. Adjust numeric values with sliders and calculations. Boost your productivity with up to 8× improved performance. DRAFT & DRAW NEW

Draw calligraphic letterforms with new Power Stroke or improved Power Brush. Modulate thickness visually with Thickness tool. Draw fluently

with Pen and Rapid toolbox sub-tools. Draw polygons and stars with Rectangle tool.

EDIT & REFINE NEW

Make slanted selections, keep selections as you switch masters, and store them in Selections panel. Use toolbox for hands-free Power Nudge, handle Nudge and Lever precision dragging, and for easier curve cleanup with Eraser. Adjust curve tension numerically. Align and collapse points. Reverse contours with Fill tool. Sort contours. Paste to replace selection. Fine-tune individual ink traps and smart corners.

CONSISTENCY & PRECISION NEW

Study the numeric values of your stem widths, segment lengths, curve tensions and corner angles with Auto-meter, or hold G to temporarily view these in Guides tool along with quick measurement and master relations. View relative node offsets. Snap to continuation lines, perpendicular lines and centerlines. See coordinates for key nodes only. Edit visual TrueType Hinting like never before.

BUILD & ASSEMBLE NEW

Convert selections to components or elements. Add decoration and attach shapes to nodes or segments with updated Glue filter, or with .glyphs-compatible Skin filter in segment, dash, corner and cap modes. Use clipping groups to mask out areas. Use text shapes to re-use scaled words or phrases from your font in existing glyphs.

METRICS & KERNING NEW

Use your mouse or trackpad to adjust metrics and kerning with high-precision Lever dragging. Hide or reduce the visibility of spacing controls for distraction-free spacing and kerning. Auto-space and auto-kern with one click or tap.

FAMILIES & VARIATION NEW

Quickly make variable fonts from static fonts. Define custom per-glyph variation axes. Re-use live interpolated instances to build glyphs with smart variable components. Set start points and reverse contours in all masters. Make contours compatible with improved Matchmaker. Group layers visually.

TEST & ADJUST NEW

Print waterfalls or interpolations from Preview panel. Batch-run selected FontAudit fixes in glyphs and masters. Create, save and run action sets that combine multiple actions. Batch-adjust stem widths in a master. Adjust by variation to replace contours with a different dynamic instance. Perform complex non-destructive contour transformations with new Delta filter.

COLOR NEW

Fill elements with gradients or solid colors. Copy-paste color fill and stroke between glyphs. Import drawings with gradients. Open and export better OpenType+SVG and new OpenType+COLRv1 fonts. Export an automatic dark-mode color palette. Overlay multiple layers into color fonts.

GLYPHS & FONTS NEW

Quickly create new glyphs with common suffixes. Clean up classes when removing glyphs. Copy-paste classes between fonts or masters. Exclude glyphs from export into final formats.

FORMATS NEW

Batch-export many fonts into many formats. Open and export the .glyphs format in version 2 or 3. Open FontForge SFD files, bitmap BDF fonts and multi-flavor color fonts. Use improved VFJ, UFO, VF support. Export WOFF2 color web fonts.

SCRIPTS & INTEGRATIONS NEW

Write and use Python 3 scripts. Seamlessly interchange with other font editing apps like Glyphs or RoboFont. Perform global transformations with the powerful TypeRig library. Create fonts for the entire Unicode 14 standard.
