### Description

HTML5 Video Player V5.3.4 WP Plugin Free Download

HTML5 Video Player WordPress Plugin contains 3 video players: right-side playlist, bottom playlist and simple versions. You have the option to select one of the 5 custom made skins which will enrich the design of your page.

It plays .MP4 video files and .WEBM (on browsers which don't have MP4 support)

HTML5 Video Player WordPress Plugin includes 3 types of video players:

- Video Player With RightSide Playlist
- Video Player With Bottom Playlist
- Video Player Without Playlist

### Features:

Responsive Design: The video player is fully responsive. Parameter to enable or disable responsive behavior.

Multiple Skins Included: You can choose from 5 skins for each player.

Multiple Instances: You can insert the player multiple times in the same page with the same skin or using a different skin.

It plays .MP4 video files and .WEBM (on browsers which don't have MP4 support)

Fullscreen: It supports full screen, having all the controllers usable in full screen mode, including playlist.

Autohide For Controllers: The controllers will auto hide on mouse out, showing the entire movie. Parameter to enable or disable this behavior.

Preview Image: A preview image can be defined for each movie

Playlist Image: A playlist image can be defined for each movie

Volume Control: You have a complete sound control. You can also set the initial volume

Description For Video – Optional: It Can Be Disabled: You can set a Title and Description for the video. Supports HTML & CSS formatted text.

Click Listener
