IDonatePro V3.0.2 WP Plugin Free Download

IDonatePro v3.0.2 - Blood Donation, Request And Donor Management WordPress Plugin

iDonate Pro – The Ultimate Blood Donation and Request Management Plugin for WordPress

iDonate Pro is a powerful and feature-rich WordPress plugin designed to simplify and automate the process of managing blood donations and requests. Whether you're building a comprehensive blood donation platform or managing blood requests for a specific organization, iDonate Pro seamlessly connects blood donors and recipients, making life-saving blood donations easier and more efficient.

With iDonate Pro, visitors can submit blood requests using a dedicated blood request form, while donors can register through an advanced donor registration system. Both requests and donors are listed in searchable directories with advanced filtering options to quickly match donors with those in need based on criteria like blood type, location, urgency, and more.

Donors also have access to a dedicated dashboard where they can manage their profiles, update personal information, view donation history, and access statistics. The powerful backend allows site admins to manage requests and donor registrations, review and approve listings, and automatically remove expired blood requests.

With its responsive design, user-friendly admin panel, and advanced customization options, iDonate Pro is the perfect solution for blood banks, hospitals, and organizations looking to create an efficient and user-friendly blood donation platform.

Unlock Premium Features with iDonate Pro:

Advanced Blood Request System: Easily enable the blood request system with an intuitive, customizable Blood Request Form. Site visitors can submit requests by providing essential details like patient name, blood type, and location. You can choose to automatically approve requests or require admin approval before they're posted.

Comprehensive Donor Registration System: Enable anyone to register as a blood donor through a detailed Donor Registration Form. Donors can manage their profiles, update availability, and be listed on searchable pages, making it easy to connect with those in need.

Advanced Search Filters: Both the donor and blood request listings come with advanced search functionality, enabling users to filter by blood type, location, availability, and more—helping to quickly find the right matches.

Donor Dashboard with Statistics: Registered donors have access to a personal dashboard where they can manage their profiles, view donation history, and access key statistics.

Individual Donor & Request Pages: Each blood donor and blood request has its own dedicated page, displaying detailed information for easy accessibility and visibility.

Auto-Expire Blood Requests: Set custom expiration rules for blood requests, with options to never delete, delete on the required date, or delete one week after the blood is needed.

Shortcodes for Seamless Integration: Use essential shortcodes for adding donor registration forms, donor listings, blood requests, and more, anywhere on your website.

Automatic Page Setup: iDonate Pro automatically creates and configures all the essential pages upon activation, making setup quick and hassle-free.

Customizable Container Width: Set unique container widths for your plugin pages, ensuring optimal display across different devices.

Google reCAPTCHA Protection: Prevent spam submissions on all forms with built-in Google reCAPTCHA integration.

Country-Specific Operation: Limit the plugin's functionality to a single country for more targeted use.

Advanced Social Sharing: Encourage sharing of blood requests and donor profiles through built-in social media integration.

Custom Pages: Use your own custom pages for iDonate Pro functionalities, allowing you to fully integrate it into your site's design.

Login and Logout Redirect: Define specific pages for redirecting users after login or logout, providing a smooth user experience.

Custom Widgets: Add custom widgets to showcase blood requests, donor statistics, and more on your site.

User-Friendly Admin Panel: Manage all blood donation and request functionalities through an intuitive and easy-to-use admin interface.

Multisite Compatible: Fully compatible with WordPress multisite setups, making it ideal for large networks.

Multilingual and RTL Support: Fully translation-ready and compatible with right-to-left (RTL) languages, making your site accessible to global users.

Custom CSS and Script Control: Advanced settings allow you to enqueue or dequeue scripts and styles, and add custom CSS for further customization.

No Coding Required: Activate the plugin, auto-generate the essential pages, and customize all the available options—no coding skills needed.

Developer-Friendly: Built with developers in mind, iDonate Pro offers flexibility and easy customization for more advanced users.

SEO Optimized: iDonate Pro is fully optimized for search engines, helping your site rank higher and reach more potential donors and recipients.

Cross-Browser Compatibility: iDonate Pro works seamlessly across all modern browsers, including IE, Firefox, Chrome, Safari, Opera, and Edge.

Frequent Updates: We regularly update iDonate Pro with new features, performance enhancements, bug fixes, and security improvements to ensure the best user experience.

Comprehensive Documentation & Tutorials: Extensive documentation and video tutorials make setting up and using iDonate Pro simple and straightforward.

Fast and Active Support: Our dedicated support team is always ready to assist with any questions or issues you might encounter.

= 4.1.1 - October 01, 2024 - Latest =
