Description

JComments AutoSubscribe V2.2.1 Plugin For Joomla 1.5 Free Download

AutoSubscribe allows automatic subscriptions for authors to comments to their articles.

Please keep in mind, that the authors will be subscribed to comments right after a first comment to an article is added. If an article already has comments, the automatic subscription will not work. This limitation is necessary in order for the authors to be able to unsubscribe from notifications. Otherwise each subsequent comment would re-establish their subscription.
