Description

Jumpstart App and Software Template

Based completely on Bootstrap HTML and CSS, Jumpstart is the perfect template choice when starting your next Saas, app or software website. Jumpstart's multipurpose landing page pack comes complete with a full HTML UI kit to round out your online presence, from help center pages, to responsive blog listings and everything in between.

Jumpstart includes a variety of landing pages to sell your software, app or online SaaS, backed up by working contact forms and Mail Chimp subscribe forms (with reCAPTCHA), interactive and customizable maps, scroll animations, counters, sliders, galleries, video backgrounds and more!

Packaged as a complete design system, there is no limit to the number of layouts you can create. Using Jumpstart's individu.
