Description

Jumpstart App and Software WP Theme Free Download

Build a beautiful WordPress business website faster than ever.
Jumpstart is a responsive, block-based WordPress theme that combines a sleek design, advanced features, and a modern workflow to allow you to quickly build multifunctional websites.

block-based design
Building pages with Jumpstart is a breeze, just select pre-made content blocks from our demo data, then mix and match your pages.Blocks are arranged in common categories to make it easier to find the perfect design.

login page
Make an amazing first impression on potential clients with Jumpstart's stylish landing page kit.Includes out-of-the-box niche layouts including insurance, loans, education, and more.In addition to niche layouts, generic landing pages showcase the style and versatility of Jumpstart's pre-made content blocks.

Inside page
Jumpstart's detailed set of pages makes it easier than ever to build your business' online presence. Engage users with engaging blogs, showcase work with filterable portfolios, and more.

Utilities page
Speed ??up your workflow and save valuable design and development time with Jumpstart's many utility pages.

Buy with confidence
We work closely with our customers to provide a high standard of support, prompt bug fixes and general troubleshooting.For over 5 years, we've supported thousands of satisfied customers and built a reputation for reliability and commitment to customer satisfaction.

True page building flexibility
Every element you see in our demo can be used on any other page, reused, removed or moved as needed to create the perfect project.Our demo shows the configuration of the blocks we provide, and you have complete freedom to use as many or as few content blocks as you want.

Includes premium plugins and features
We want to make your life as easy as possible with Jumpstart, so we offer a range of premium features and plugins for free with every purchase.Use or not, they're available if you want them, and completely optional if you're trying to keep your site slim and fast.

Localization and multilingual preparation
Jumpstart is RTL ready, use the included .pot file, and we also have WPML (sold separately) if you want to run your site in a multilingual setup.
