Description

Jurassic World V1.57.10 Android Mobile App.

Jurassic World: The Game is a strategy and action game where you can create your own Jurassic Park from scratch. As the name suggests, you can also find all the new changes from the movie Jurassic World.

You can design and build the park however you want, placing buildings wherever you choose. You need a hotel and recreational facilities for the visitors, and of course cages for the different types of dinosaurs.

In Jurassic World: The Game, you can find more than 60 different types of dinosaurs, between land and sea creatures. You can breed and collect the dinosaurs, and besides having them for show, you can also level them up and make them fight other dinosaurs.

These battles, where you can't control the dinosaurs directly, are perfectly recreated in 3D, so you can watch the T-Rex fighting in all its glory.

Jurassic World: The Game is an excellent strategy game, with elements of action and management. Not only do you have to keep a good balance of the park's resources (meat, money, grass, etc.), but also control your dinosaurs.
