Description

Max Mega Menu V3.3.1 WP Plugin Free Download

Max Mega Menu will automatically convert your existing menu into a mega menu. You can then add any WordPress widget to your menu, restyle your menu using the theme editor and change the menu behaviour using the built in settings. Max Mega Menu is a complete menu management plugin, perfect for taking control of your existing menu and turning it into a user-friendly, accessible and touch ready menu with just a few clicks.

Mobile:

Automatic support for native touch events

Off Canvas Mobile Menu option built in

Specify your own Responsive Breakpoint

For items with sub menus, choose between “First click opens sub menu, second click closes sub menu” or “First click opens sub menu, second click follows link”

Option to hide sub menus on mobile

Mobile Toggle Bar designer allows you to tailor the toggle bar elements to fit in with your site design

Features:

Builds upon the standard WordPress menus system

Restores the Appearance > Menus screen in “full site editing” themes

Supports multiple menu locations each with their own configuration

Off canvas (slide in from left or right) or standard drop down mobile menu

Organise your sub menu content into rows and columns using the Grid Layout builder

Display WordPress Widgets in your menu

Fully customise the styling of your menus using the built in theme editor

Supports Flyout (traditional) or Mega Menu sub menu styles

Hover, Hover Intent or Click event to open sub menus

Fade, Fade Up, Slide Up or Slide sub menu transitions

Add icons to menu items

Menu item options including Hide Text, Disable Link, Hide on Mobile etc

Align menu items to the left or right of the menu bar

Align sub menus to left or right of parent menu item

Display your menu using Automatic Integration, Block, Widget or Shortcode.

Accessibility:

Keyboard Navigation built in

TAB activates keyboard navigation and navigates through the menu

ENTER or SPACE on a sub menu arrow indicator shows/hides the sub menu

ESC closes all open sub menus

Max Mega Menu is developed with a focus on code quality, performance and usability.

The only mega menu plugin with zero "important", block or inline CSS styles

Menus are styled using a single, static CSS file

Less than 2kb JavaScript (when gzipped)

Responsive, touch & retina ready

Built with accessibility in mind – keyboard navigation supported

Extensively tested in all modern desktop and mobile browsers

Clean code with a low memory footprint

Supports all core nav_menu filters (prepend filter name with "mega_")

In depth documentation

Basic Support included with free version
