Description

MetaFans - Community & Social Network BuddyPress Theme

Social networking & community theme for your WordPress site!

We have carefully crafted this theme for you to have all you need to build an incredible community with full profiles, verification badges, reactions, groups, badges, quests, ranks, credits, and much more to come!

Metafans empowers your social profile connecting to friends and increasing followers

Social Community Powered By Buddypress With the advantages of the Buddypress plugin we extended it with reactions, shares, media, and much more!

Incredible Gamification with Gamipress Metafans has created a full gamification experience with badges, quests, credits, and ranks to give an awesome experience to your users!

Design with elementor page builder All pages are carefully crafted to fit all you may need! Also, we include demo data to our API to get an unleash experience

Super Flexible Profile & Activity Pages

Metafans provides a super complete profile page with an elegant design, boxes, and a slider for easier access to all profile sections like: about, badges unlocked, images, quests completed, posts, and much more!. You'll also find other community pages, like activity, complete profile settings, members and groups directory, and much more!.

Renovated Profile Status Updates Form!

We renovated the Buddypress status update box! Easily upload photos, GIFs. post status updates, edit your posts, and even link Youtube videos just by pasting the URL!! You'll count with a wide range of both status update and activity posts (like when someone becomes your friend). You'll also have the option to mark your posts as pinned, favorite and private, all easily recognizable with our custom icons!

Gamipress: Badges Gamification

Using the Gamipress Achievements feature we composed a badges policy where you can unfasten them and earn credits to unlock profile ranks! You can also insolently show them in your profile with the badge widget!

Gamipress: Quests Gamification

Using the Gamipress Achievements feature we also produced a searches system where you can complete them and earn credits to unlock

profile ranks! Like the badges, you can proudly show them in your profile with the quests widget!

Gamipress: Credits & Coins Gamification

Using the Gamipress Points feature we created three different credits: Gold, Gems, and Emeralds. Use them to unlock new ranks and level up! You can proudly show them in your profile with the credits widget and also you'll be able to always see your current balance on the top bar.

Gamipress: Ranking Gamification

Using the Gamipress Ranks feature we created a 6 ranks system where you can "level up" by collecting credits and completing requirements! We've also linked your rank number and progress to profile avatars! You'll be able to quickly see each user's rank and progress via the outer progress bar.

Amazing Blog Page with Reactions

A complete blog with 3 different views: list, small grid, and big grid to help people quickly search their favorite post. We prepared different post types like standard, video, audio and gallery and three different open post views. Also, like with the BuddyPress post updates, we added reactions so people can show what they think about it!

Incredible Groups with Easy Management

So your users don't have to make changes via the Wordpress panel, we created an author hub where they can easily change their avatar, cover photo, social networks, personal information, and much more!

Stylish Author Hub Management

Easily create and manage BuddyPress groups! Inside the author hub we created an stylish management system so you can easily create and manage your groups, promote authors to mods or admins, check invitations, and more! As part of our documentation, we created a lot of videos to help you with the setup and customization of every part of our theme, you can check all those videos here on the top banner. Please ask us all questions that you need before buying!
