Description

Start an online marketplace platform with MultiMerch

MultiMerch is more than a B2B/B2C multi vendor marketplace solution for your ecommerce business.

We make it easy to start a marketplace platform with vendors via:

our white-label marketplace software with lifetime updates
best in class technical support and implementation partners
an invite-only community for marketplace owners

How do you start a multi vendor marketplace?

Multi vendor product marketplaces (also called two-sided, peer-to-peer or just online marketplaces) are platforms where:

third party vendors offer their products for sale
buyers purchase products from multiple vendors
the marketplace generates revenue via fees
We wrote (almost) a book on starting a two-sided online marketplace business – check it out!

The MultiMerch Platform is the software solution for your marketplace business

Launch a platform that accepts sellers

Every new seller gets their own store, profile and dashboard on your platform to manage their products and orders.

Sellers list products on your marketplace

Your sellers can publish their own products to start selling in minutes and manage their inventory within your marketplace.

Buyers purchase directly from your sellers

Buyers can purchase from multiple sellers at once, every seller has their own order control panel to process customer orders.
