Netlify is a remote-first cloud computing company that offers a development platform that includes build, deploy, and serverless backend services for web applications and dynamic websites.

The company enables building, deploying, and scaling websites whose source files are stored in the version control system Git and then generated into static web content files served via a content delivery network. Netlify Functions are used in building dynamic websites with interactive features. The Netlify platform integrates with various plugins and application programming interfaces (APIs) to add extra features/functionality for web projects.
