Description

Nextend Social V.3.1.11 WP Plugin Free Download

Nextend Social V.3.1.11 Login is a professional, easy to use and free WordPress plugin. It lets your visitors register and login to your site using their social profiles (Facebook, Google, X (formerly Twitter), etc.) instead of forcing them to spend valuable time to fill out the default registration form. Besides that, they don't need to wait for validation emails or keep track of their username and password anymore.

Nextend Social Login seamlessly integrates with your existing WordPress login and registration form. Existing users can add or remove their social accounts at their WordPress profile page. A single user can attach as many social account as they want allowing them to log in with Facebook, Google or X (formerly Twitter).

THREE POPULAR PROVIDERS: FACEBOOK, GOOGLE AND X (FORMERLY TWITTER)

Providers are the services which the visitors can use to register and log in to your site. Nextend Social Login allows your visitors to log in with their account from the most popular social networks: Facebook, Google and X (formerly Twitter).

FREE VERSION FEATURES

One click registration and login via Facebook, Google and X (formerly Twitter)

Your current users can easily connect their Facebook, Google or X (formerly Twitter) profiles with their account

Social accounts are tied to a WordPress user account so every account can be accessed with and without social account

You can define custom redirect URL after the registration (upon first login) using any of the social accounts.

You can define custom redirect URL after each login with any of the enabled social accounts.

Display Facebook, Google, X (formerly Twitter) profile picture as avatar

Login widget and shortcodes

Customizable designs to match your site

Editable and translatable texts on the login buttons

Very simple to setup and use
