Description

Notibar Plugin Free Download

This plugin adds a top notification bar to indicate significant announcements on your website. It's easy for you to set it as a sticky header to be visible when scrolling. The Dismiss button can be disabled, closed permanently, or toggled so that your visitors can easily find it again.

Customizer for sticky header, notification bar, alert, promo code, marketing campaign, top banner

Instant Live Preview mode helps you see how every setting affects the notification bar before you publish it.

This is a great top bar for all preferential notices you might need in the incoming holidays, COVID-19 updates and events of all kinds.
