Description

Start your own website like OnlyFans.com or Patreon.com and grow like mad. It's like a social network but allows content creators to directly earn MONEY from their FANS for their PREMIUM content.

PHP FansOnly Patrons Description

Creators posts content

A creator can post two types of contents:

Unlocked: available to all free subscribers in their feeds and the public checking out their creator profile.

Locked: available to fans (paid monthly membership subscribers) or the ones who tip for the post.

Content types: text, image, audio, video

And have two income streams

Monthly membership fans these users will have access to all their content as long as they're paying the monthly fee

Tips for single posts these users will have access a single locked post on which they need to tip a minimum amount set by creator.

Users can interact with posts

They can Love posts like on any social network

Leave comments on posts like on OnlyFans and Patreon

Worldwide Payments Coverage

Integrated the three ways to get paid:

Stripe for the credit card payments

PayPal for everyone

Manual where admin can take payments in cash and add plan manually to each user

DM Feature: Messaging made easy

Of course, what would be a social platform without a way to chat?

Notifications? We have that too!

An user will be notified on the platform when:

They get a new like

They get a new paying fan

They get a free follower

They get a tip from someone

They have an invoice processed

They have a payment issue

They have a comment on a post

They're @mentioned in a post

Admin earns percentage from everything

This is how you will earn as an admin : You'll configure a fee which you'll take on any subscription and tips payments processed.
