Description

Programming TelePrompter V2.8.0 Free Download

Programming TelePrompter v2.8.0:

Programming TelePrompter is a cleaner text / presentation desktop easy-to-use, modern and powerful for Windows. The program can display a scrolling text smoothly in a window can change size or fullscreen on the computer to your desk. It has the technical latest programming (Microsoft .Net 4 / WPF) are using the integrated hardware of the GPU (unit of graphical processing) of the computer. To have that experience smoother rolls in a large window, the graphics card must be strong enough.

The features of the Programming TelePrompter

- * Scroll speed is adjustable in wide range, use the trackbar or the mouse wheel
- * 5 location text - download text from the file, or enter manually
- * The background and text color can choose, font, line height, alignment and margin
- * Label percent to display the percentage that has passed of the text is scrolling (which is correct adjustment when changing speed)
- * Pause option on the Mouse on-Over-Mouse
- * Eyeliner options, contour display semi-transparent around the middle lines of text (can adjust height and color)
- * Mode, semi-transparent (0.90 pct), to display another window under the reminder
- * Function rub - rolls in your text with a slider
- * Transfer to 10% .. 90% selected text with the click of a button.
