Resident Evil: The Final Chapter is a 2016 action horror film written and directed by Paul W. S. Anderson. The direct sequel to Resident Evil: Retribution (2012), it is the sixth installment in the Resident Evil film series and the final installment in the original series, which is based on the video game series of the same name. The film stars Milla Jovovich, Iain Glen, Ali Larter, Shawn Roberts, Eoin Macken, Fraser James, Ruby Rose, Rola, and William Levy. In the film, Alice and her friends are betrayed by Albert Wesker, who gathers the entire forces of the Umbrella Corporation into one final strike against the apocalypse survivors.

A sixth film in the series was announced to be in development by Sony Pictures in 2012, and Anderson later expressed his desire for it to "come full circle", bringing back characters, themes and the environment of the Hive from the first film. It was filmed in 2D and post-converted to stereoscopic 3D, and principal photography commenced on September 18, 2015 in South Africa.

Resident Evil: The Final Chapter was released on December 23, 2016, in Japan and on January 27, 2017, in the United States in 2D, 3D and IMAX 3D. The film received mixed reviews and became the highest-grossing film in the franchise, earning over \$312 million worldwide against a \$40 million budget. A reboot, Resident Evil: Welcome to Raccoon City, was released November 24, 2021.

**SYNOPSIS:** Dr. James Marcus, the founder of the Umbrella Corporation, had a daughter, Alicia, who was dying of progeria. Desperate to save her, Marcus confiscates an untested embryonic Umbrella project created by his colleague Dr. Charles Ashford—the T-virus—and uses it on Alicia and others with the disease. After one child treated with the virus dies and becomes a zombie, Marcus immediately orders the project terminated, all data on it be destroyed, and forbids Ashford from ever pursuing it again, devastating Ashford who needed the T-virus to save his own daughter Angela. Marcus's partner, Dr. Alexander Isaacs, has Marcus murdered by Albert Wesker, adopts Alicia, and takes over the Corporation.

In the present, Alice awakens in the ruined White House, after Wesker betrays her. The Red Queen appears and tells her she has 48 hours to infiltrate the Hive, a facility beneath Raccoon City. The Umbrella Corporation has an airborne anti-virus that can kill every zombie but is waiting for the last few remaining humans to be wiped out. As her body carries the virus, Alice does not expect to live after the mission.

While traveling, Alice is captured by Isaacs, learning the "Isaacs" she previously killed was a clone. She escapes his convoy and reaches Raccoon City, where she meets a group of survivors: Doc, Abigail, Christian, Cobalt, Razor, and Claire Redfield, who survived the attack on Arcadia. Isaacs' convoy approaches, trailed by a horde of zombies. Alice and the group defeat them and retrieve Isaacs' few human captives, though Cobalt dies in the process. Alice and the crew enter the Hive, where Wesker is in control. He releases mutated guard dogs, killing Christian and a freed captive.

The Red Queen appears to Alice and explains that her program is in conflict, as she can never hurt an Umbrella employee but also must value human life. She plays a video of Isaacs explaining to Umbrella's executives a plan to release the T-virus, cleansing the world of humanity and leaving many of the rich and powerful, including the company executives, stored in cryogenic capsules in the Hive, with the intention of rebuilding the world following the resulting apocalypse. The Red Queen warns Alice that someone in her group is helping Umbrella.

The group encounters several traps that end up killing Abigail and Razor. Alice and Doc plant bombs throughout the Hive taken from the leftover equipment by the first Hive team, and confront the real, tech-upgraded, Isaacs. Doc turns out to be Umbrella's spy, and Claire is captured by Wesker. A cryogenic capsule opens, releasing Alicia Marcus, Umbrella's co-owner, and Marcus' daughter. Isaacs and the Red Queen reveal to Alice that she is actually a clone of Alicia. Isaacs plans to eliminate the pair and assume control of Umbrella. Alicia fires Wesker, allowing the Red Queen to terminate his protection program, and crush his leg with a security door. Doc tries to shoot Alice, but his gun is empty—as Alice had earlier deduced his treachery—and Claire kills him. After giving Wesker a deadman's switch to the primed bombs, Alice and Claire pursue Isaacs while Alicia uploads a copy of her childhood memories.

Isaacs, Alice, and Claire fight. Isaacs overpowers them at first, but Alice manages to activate a grenade in his pocket and kill him. She escapes to the surface with the anti-virus, but Isaacs reboots and catches her before she can release it. Before he can kill her, the Isaacs clone from the convoy arrives and kills him, believing himself to be the original Isaacs. The clone is then devoured by the undead. Alice releases the anti-virus, killing all of the zombies around her before she passes out. Wesker simultaneously drops the deadman's switch, destroying himself, Alicia, the Hive, and the hibernating elite.

Claire wakes Alice, who survived because the anti-virus killed the T-virus within her body, not the healthy cells. The Red Queen uploads Alicia's childhood memories into Alice, granting her a childhood. With the anti-virus being carried by the winds, it will take years to reach all corners of the globe, and until it does, Alice vows to continue her mission.
