### Description

SCLogin V9.0.198 Enhanced Login Module Free Download

SCLogin is a free and fully supported enhanced login module for Joomla 3.x and Joomla 4.x. This module is based off the Joomla 3.x login module, with improvements like:

- \* A horizontal mode
- \* An easy template system
- \* Improved two-factor authentication that asks for a separate password only from those users who have it configured
- \* Streamlined looks
- \* Modal popup view for login
- \* Customizable user menu displayed when users are logged in

Additionally, the new module seamlessly integrates with JFBConnect for Facebook, Google, LinkedIn and Twitter authentication and login on your site.

Go ahead, give it a try!
