SiteSpy V5.1.3 - The Most Complete Visitor Analytics & SEO Tools

The Most Complete Visitor Analytics & SEO package including visitor analytics (unique visitor, page view, bounce rate, average stay time, average visit, traffic analysis, top refferer, new & returning visitor, content overview, country & browser report, os & device report etc.) , web analytics (alexa data, whois data, social media data, moz check, search engine index, google page rank, IP analysis, malware check) , SEO tools (link analysis, keyword position analysis, auto keyword suggestion,page status check etc.)

You will also get several bonus utility tools such as email encoder/decoder, metatag generator, ogtag generator, plgiarism check, valid email check, duplicate email filter, url encode/decode, robot code generator etc.

It's a multi-user SaaS application means you can resell the Software as a Service. PayPal, Stripe, Instamojo, Mercadopago, Mollie, Myfatoorah, Paymaya, Paystack, Razorpay, SSLCOMMERZS, SenangPay, Toyypay, Xendit are integrated so that you can receive payment from your end users. If you want to use the SaaS features and charge your end user for using the service you have to buy extended license.

It has native API by which developers can integrate it's facilities with another app.

Nice colorful widgets are available. You can simply copy & paste some line of codes to any page you want and can display site information.
