### Description

#### Subtitle Edit V4.0.2 Free Download

Subtitle Edit V4.0.2 for windows is a free (open source) editor for video subtitles - a subtitle editor :)

With SE you can easily adjust a subtitle if it is out of sync with the video in several different ways.

You can also use SE for making new subtitles from scratch (do use the time-line/waveform/spectrogram) or translating subtitles.

For a list of features see below or check out the Subtitle Edit Help page.

On my blog you can download latest beta version and read about/discuss new features.

Also, you can watch a few videos about installing and using Subtitle Edit.

A Subtitle Edit dll (LibSe.dll) is available for programmers (BSD New/Simplified license). Compile it from source code or use the NuGet package.

Download latest version of Subtitle Edit

Note: SE requires Microsoft .NET Framework Version 4.8

Get the full C# source code - GPL or LGPL license

Blu-ray sup reading code is under the Apache License and Matroska subtitle parsing uses zlib code with a BSD style license.

### Features

Create/adjust/sync/translate subtitle lines

Convert between SubRib, MicroDVD, Advanced Sub Station Alpha, Sub Station Alpha, D-Cinema, SAMI, youtube sbv, and many more (300+ different formats!)

Cool audio visualizer control - can display wave form and/or spectrogram

Video player uses mpv, DirectShow, or VLC media player

Visually sync/adjust a subtitle (start/end position and speed)

Audio to text (speech recognition) via Whisper or Vosk/Kaldi

Auto Translation via Google translate

Rip subtitles from a (decrypted) dvd

Import and OCR VobSub sub/idx binary subtitles

Import and OCR Blu-ray .sup files - bd sup reading is based on Java code from BDSup2Sub by 0xdeadbeef)
