Description

Termux

Terminal emulator with packages

Termux combines powerful terminal emulation with an extensive Linux package collection.

- * Enjoy the bash and zsh shells.
- * Edit files with nano and vim.
- * Access servers over ssh.
- * Compile code with gcc and clang.
- * Use the python console as a pocket calculator.
- * Check out projects with git and subversion.
- * Run text-based games with frotz.

At first start a small base system is downloaded - desired packages can then be installed using the apt package manager known from the Debian and Ubuntu Linux distributions. Access the built-in help by long-pressing anywhere on the terminal and selecting the Help menu option to learn more.

Version 0.118.0 (118) suggested Added on 2022-01-11

This version requires Android 7.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.

Permissions

view network connections

Allows the app to view information about network connections such as which networks exist and are connected.

have full network access

Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.

modify or delete the contents of your shared storage

Android: Termux Free Download

Allows the app to write the contents of your shared storage.

prevent phone from sleeping

Allows the app to prevent the phone from going to sleep.

control vibration

Allows the app to control the vibrator.

run foreground service

Allows the app to make use of foreground services.

ask to ignore battery optimizations

Allows an app to ask for permission to ignore battery optimizations for that app.

This app can appear on top of other apps

This app can appear on top of other apps or other parts of the screen. This may interfere with normal app usage and change the way that other apps appear.

request install packages

Allows an application to request installation of packages.

read the contents of your shared storage

Allows the app to read the contents of your shared storage.

Version 0.117 (117) - Added on 2021-07-12

This version requires Android 7.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.
