Description

TheAdmin - Responsive Bootstrap 4 Admin, Dashboard & WebApp Template

TheAdmin is a responsive, professional, and multipurpose admin template powered with Bootstrap 4. TheAdmin is a powerful and super flexible tool, which suits best for any kind of web applications such as: app admin, eCommerce websites, CMS backends, CRM, SAAS, web applications, support & social portals, personal business, corporate websites, etc. TheAdmin is definitely a great kick starter for your web project.

TheAdmin design is harmonious, clean and user friendly. Even though the template has a lot of content, it doesn't look messy and all files and code are well structured, commented and divided. TheAdmin has a huge collection of plugins and UI components and works seamlessly on all major web browsers, tablets and phones.

TheAdmin is fully based on SASS pre-processor CSS language, includes 140+ commented SCSS files. Each file corresponds to a single component, layout, page, plugin or extension – so you can easily find necessary piece of code and edit it for your needs. The package includes both normal and minified CSS files, compiled from SCSS.
