### Description

User Role Editor Pro V4.64.2 WP Plugin Free Download

To get Pro version of User Role Editor WordPress plugin signup for a membership. One year subscription starts from \$29 only. Look on the Membership Levels available.

If you have subscription for one of our membership plans already, please Sign In to your membership account and return here in order to download your copy of User Role Editor Pro.

Why go Pro? Pro version offers extended functionality. It is advertisement free. Buy Pro version and join to the 3810 active subscribers. Look on the Pro version additional features list and take right effective decision:

Block selected admin menu items on per role base (more details...)

Show front end menu item for everyone, logged-in users, logged-in users with selected role(s), not logged-in visitors only (more details...)

Block selected navigation menus from editing for selected role (more details...)

Block selected widgets and sidebars under "Appearance" menu on per role base (more details...)

Block selected meta boxes (dashboard, posts, pages, custom post types) for roles (more details...)

Block access to the other roles for the selected role (more details...)

Per plugin access for roles and users with "activate\_plugins" capability (more info...);

Export and Import user roles

Multi-site: Roles and users management for all sites at Network Admin from one point: edit, replicate roles to all subsites, assign roles and capabilities to the users, replicate existing user together with his permissions to all sites of the network.

Multi-site: Restrict access of single sites administrators to the selected user capabilities and Add/Delete role operations inside User Role Editor (more info...)

Multi-site: Superadmin can setup individual lists of themes available for activation to selected single sites administrators (more details...).

Content edit access restriction features:

Force all custom posts types to use its own custom capabilities set instead of usage of one built on the base of the 'post', e.g. 'edit\_videos' instead of 'edit\_posts'.

Activate "Create" capability for posts/pages/custom post types. For example, without a 'create\_post' capability user will be allowed just edit the existing posts.

Users access restriction for editing selected posts and pages only by post/page ID, or/and category/taxonomy ID, or/and author user ID (more info...);

Users access restriction to Gravity Forms by forms ID list (more info...);

Content view access restriction for selected roles and with short\_codes (more info...)

Manage what widgets are shown for what role (more details...).

Admin pages permissions viewer shows at the bottom of every admin backend (wp-admin) page the user capabilities list checked by this page and plugins hooked to it (more details...).
