Create beautiful front-end user profiles and community sites in WordPress using UserPro.

It comes packed with amazing features like,

- + Customizable login and registration forms
- + Social connect and integration
- + User badges
- + Multiple member list displays
- + Viral marketing
- + Content restriction
- + Public/ private feed
- + Verified accounts, and much more.

It is simply an all-in-one plugin to help you create a complete community site. UserPro offers beautiful front-end profiles, login and registration for WordPress. Besides these, UserPro comes with loads of other features like social connect and integration, viral marketing, user badges, verified accounts, content restriction, public/private activity feed, and more. It is simply all-in-one plugin!

With UserPro, you can do just about anything you need for your WordPress Community website

- + Build your own community with searchable members directory
- + Give each user a custom and elegant profile
- + Add front-end, customized registration and login to your website

User Login and Registration:

- + Embed a fully customizable registration form anywhere you want
- + Choose which fields appear during registration, from text inputs to photo and file uploads
- + Easily organize and re-order your fields, help tooltips, field icons, and more
- + Control which tabs are collapsed, or collapsible
- + Have full control on the form/fields

See Registration Form Example

- + Highly interactive front-end login
- + Ajax error handling
- + Tooltips and custom redirection support
- + Allow users with Social Media Accounts to signin/register instantly

See Login Form Example
