Description

Vibrant A Super Sharp WP Mobile Theme Free Download

Vibrant V1.5 is super clean, light and was built with minimalism in mind. That said, the theme's stand-out elements like the unique menu display, comment form and per-post/page custom header colors ensure it doesn't look generic and is immediately memorable to the user.

Vibrant can also serve many purposes. Use it for a simple blog, a mobile home for your business, to show off your portfolio, etc. It can also be used as a secondary, mobile-only theme on your existing WordPress installation or set up as the main theme on a brand new installation. You can even use it for a full-blown desktop site if you so choose.

Features list:

extremely clean design

super unique 2-level accordion menu display

beautiful and subtle use of CSS3 and jQuery animations

clean and minimal jQuery comment form

PageLoader plugin included

per-post/page header colors (choose between 9 carefully picked colors)

touch-enabled gallery (customized PhotoSwipe)

'install as webapp' on iOS

ready for translation/localization (.mo, .po files included)

contact form with validation

widgetized front page footer

ready-to-edit child theme included

liquid design

tested on several browsers across multiple operating systems and devices (Chrome, Firefox, Internet Explorer, Safari, Opera, iOS, Android)

fully retina-ready

a ton of extremely customizable shortcodes: alerts, progress bars, text highlighting, dividers, buttons, boxes etc. + shortcodes for YouTube, Vimeo, USTREAM, DailyMotion, Blip.tv + easy shortcode for placing content in columns (text, images, as well as video)

extensive documentation

We hope you have a thorough look around the demo site and that we can welcome you as a customer shortly!
