Description

VideoProc Converter AI V7.1 Multilingual Free Download

VideoProc Converter AI v7.1 Multilingual Full Version, One-Stop Video Processing Software. Free Download VideoProc Converter AI full version standalone offline installer + Portable for Windows PC previously known as WinX HD Video Converter Deluxe is your one-stop video processing software designed to edit, cut, crop, merge, adjust, convert, and compress (4K) videos with Full Hardware Acceleration.

We extract subtitles from videos for different purposes. For example, we extract the subtitles of a low-resolution video file, and then add them to a high-resolution version for getting a better visual experience. We find nice courses from YouTube and wish to separate subtitles as the learning context for further study. With that in mind, the following can be deduced: To find the easiest way to extract subtitles from MKV, MP4, AVI, VOB or other videos as SRT, ASS files, we should get a versatile subtitle extractor that can cope with videos in a different type of formats.

After testing a majority of subtitles extractor for days, we realize the best option for both PC and Mac - VideoProc Converter AI, which enables users to split subtitles from MKV videos or virtually any other videos in a few clicks. Meanwhile, it allows you to import subtitles to a video from a computer or a connected external hard drive/USB, as well as search subtitle files from online before importing to videos. By the way, you're also allowed to extract subtitles from MKV with subtitles Edit and MKVToolnix.

Overview of VideoProc Converter AI

As the greatly enhanced successor, VideoProc integrates a UHD video converter/compressor (YouTube) video downloader with a video editor, giving you ultimate control over any multi-track, SD, HD, and 4K video files on your PC. Level-3 Hardware Acceleration tech makes the utmost of Intel QSV, NVIDIA CUDA/NVENC, and AMD to encode and decode videos, which can averagely speed up video processing 64x. Faster than real-time!

VideoProc is skilled at editing oversized videos recorded from GoPro, DJI, and 4K cameras for stabilizing, denoising, cutting, filtering, splitting, merging, and subtitling. In parallel, it is a video converter and compressor whiz that helps transcode HEVC / H.264 videos, convert any videos, audio, and DVDs, such as MKV to MP4, M4A to MP3, and DVD to MP4, and make such media content playable on giant TV screens or portable devices. Besides, it is a part video audio downloader and a one-part screen/webcam video recorder.

Features of VideoProc Converter AI

Stabilize shaky video footage from GoPro, iPhone, etc.

Correct fisheye lens distortion from action cam video.

Remove or reduce unwanted background/wind noise quickly.

Turn the video into GIF, extract jpg/png from the video, and resize the image.
Watermark your video with text, logo, image, or timecode.
Pass through video streams into MKV with no encoding.
Build an M3U8 playlist with single or multiple .ts files for HTTP streaming.
Force a/v sync and adjust playback speed and audio volume.
