### Description

WCFM WooCommerce V1.0.0 WP Plugin Free Download

WCFM WooCommerce Plugin V1.0.0 : Print orders to each vendor printer

This plugin allows you to automatically transmit WCFM orders (Marketplace plugin for Woocommerce) to the printers of each seller.

The seller does not need to connect to the WordPress web interface, the tickets are printed automatically, without PC or tablet, with all the necessary instructions to prepare the order (name, surname, ref, phone, address, type of delivery ... etc).

How to install the Expedy's plugin / module

Download the plugin :

In your WordPress/WooCommerce, go to : Admin WordPress > Plugins > Add new

Click on Upload plugin

Click on Choose a file and select the .zip file you downloaded in the first step.

Click on Install now

Click on Active now after the file has been downloaded

Settings of the Expedy's plugin / module

In your WordPress/WooCommerce, go to : Admin WordPress > Installed plugins

In the Expedy Section, click on Settings to change the parameters
