Description

Whatsapp Indigo Android 5.60

Whatsapp Indigo for Android is a MOD of the famous chat and instant messaging app with which we can add new functions and features to the original client

WhatsApp MODs have become very popular for including functions that the messaging app hasn't thought of introducing at the same pace as the demands made by its users. That's why many people consider them as interesting tools to customize this chat app.

Indigo, between violet and blue

Hidden between WhatsApp Plus, YOWhatsapp or OGWhatsApp, we can find this Whatsapp Indigo, a development that offers us similar features to those of the rest of MODs but with its personal touch based on the indigo color. In any case, although similar, we have to take a look at its functions:

Developed upon the official WhatsApp Messenger APK.

Possibility to customize the app with our own themes.

Greater variety of emojis.

Elements such as icons or conversation bubbles adapted to the indigo mode.

More possibilities when it comes to managing our privacy being able to freeze the last seen time in our chats.

The only drawback, which is quite important, about this MOD is that although your download its APK and try to install it, you won't be able to do much because it hasn't been updated for quite a long time and its update system, obviously based on the original WhatsApp, is going to force you to update to a newer version of the app.

What is Whatsapp Indigo?

Whatsapp Indigo is a modified version of official Whatsapp, which is based on GB Whatsapp. It comes with many unique and extra features than the official Whatsapp. In this Whatsapp mod, you can read revoked messages, send larger files, download Whatsapp statuses, and much more. The interface of this Whatsapp is very beautiful yet customizable. You can now add custom themes, fonts, logos, styles, and much more in this Whatsapp mod. It also comes with an anti-ban feature, which protects your account from the ban.

Features of Whatsapp Indigo

Send larger files

larger file

This WhatsApp mod apk allows you to send larger files on WhatsApp. Now, you can share the videos and files up to 1GB. On official WhatsApp, you can only share the file up to 72MB but now this limit is increased in this mod apk. You can also share other files such as pdf, zip, etc as well in this WhatsApp mod apk up to 100MB.

Online Status Hide/Freeze

Hide/Freeze Online Status

In this WhatsApp mod apk, you can also hide and freeze your last seen. It comes with a freeze last seen feature. If you enable this feature then you can show offline while being online. You can chat with different people and much more without showing online. Nobody can get that you are online or offline. You will be shown offline to all your WhatsApp contacts.

Status Downloader:

Status Downloader

This WhatsApp mod apk also includes a status downloader, which allows you to download WhatsApp status with just a single click to your phone's gallery. You do not need any third-party app for downloading WhatsApp statuses.
