SYNOPSIS: In the future, the company "Wifelike" creates expensive artificial android replicas of dead women for their widowers. The companions are subservient to their respective owners while gradually developing consciousness. S.C.A.I.R., a group of militant activists, seek to destroy the company for their AI exploitation, seeing the companions as contemporary slaves. A branch of their group is committing terrorist acts to accomplish their mission; these supposedly involve stealing the robots from their wealthy owners, reprogramming them, and using them to perform various kinds of crimes, including bombing buildings. The police are unable to locate their mysterious leader, nicknamed "the Ringmaster".

William Bradwell, a seasoned policeman, works in finding stolen androids and returning them home. He orders one made to resemble his deceased love, Meredith. Once activated, the companion starts learning about Meredith to become more like her. According to William, Meredith used to be a S.C.A.I.R activist, until she fell in love with him, abandoned her cause, and they got married. However, this is not the first time that William has been through this process with a Meredith replica, as previous iterations of her have already been stolen by S.C.A.I.R. and recovered by him, with her memory of the experience being wiped every time.

While becoming more like Meredith, William's companion starts dreaming about a masked man who claims to know her from before her last memory wipe. She also starts receiving visits from Louise, a member of S.C.A.I.R. who seems to have talked to the companion's previous iterations. Meanwhile, William discovers that some of the companions have joined S.C.A.I.R. on their own accord to escape their male owners. One of them kills herself after William finds her, not wanting to lose her memory and return to the role of a subservient wife.

After learning of his companions' dreams, William convinces his partner, Jack Doerksen, to help him get into the "dreamscape" that manages the companions and their thoughts so he can arrest the masked man, who claims to be the Ringleader. The two have a physical confrontation, but the companion disconnects him from the Dreamscape before he can murder the Ringleader. William is furious at his companion and storms out of room, refusing to explain to Jack why he lied to him about his intentions.

William takes his companion to Wifelike to have her memory wiped again. Before being submitted to the procedure, the companion talks to other androids; most of them seem to be members of S.C.A.I.R. and recognize her as one of their own. They tell her she has hidden certain memories in her hard-drive and can access them even after they reboot her. She has been maintaining her role as William's companion in the hopes of learning something important. Her memory is wiped again, and the companion fools William into believing that she does not remember anything from the night before.

Jack's girlfriend is visited by Louise, who delivers digital proof that the man who they have identified as the Ringleader, Keene Morrison, has been dead for a long time and only exists in the hard drive of William's companion. Jack confronts William with this information. William admits that he killed Keene, who was Meredith's actual boyfriend, and forced Meredith to live with him as he was in love with her. Their abusive relationship ended with William smothering her with a pillow and putting an engagement ring on her dead body so he could have her remade as an android by Wifelike.

Having been caught, William kills Jack in cold blood. The companion reveals that William has been manipulated from the start, with Louise using a mask and voice changer to impersonate Keene and reveal his true character to Jack; she now has proof that he also murdered the real Keene and stole the ring he planned to give to Meredith. The companion overrides her safety protocols, beats and smothers William to death, and returns to her S.C.A.I.R. base, where she meets with other free companions. She is the actual Ringmaster, and with her group, she decides to take the next step in the coming revolution.

The founder of Wifelike puts out a public message announcing that his company is prepared to take a more active role in the fight against S.C.A.I.R. and the rogue companions. He reveals that William, now an android himself, will be in charge of this new effort.
