Description

Woo Mailchimp Discount Plugin Free Download

WooCommerce Mailchimp Discount helps you to easily make your MailChimp list healthy by providing a one time discount when someone subscribes to your mailchimp list.

This plugin automatically adds a MailChimp subscription popup to your website which can be used to capture the Emails and when the user successfully subscribed to your list then he gets a coupon code. Whenever a new user signups for your newsletter the plugin automatically generates a coupon code based on the admin settings and email it to the registered email id.
