### Description

Woo Table Rate Shipping Plugin Free Download

Advanced Shipping Options:

This table rate method for WooCommerce has the ability to add multiple rates for a given customer based on a variety of conditions set by admin. These can include shipping destination, cart subtotal, item shipping class, price, weight, and so much more.

The table rate shipping module extends WooCommerce's default shipping options giving you highly customizable shipping options.

Define multiple shipping rates based on location, price, weight, or item count. Wildcards may be used to match multiple regions too.

Add multiple tables of rates per shipping zone

Several types of table rate calculation: Per order, Calculated per item, Calculated per line, Calculated per class

Add rules based on Weight, Number of items, Number of items by class and Price

Add costs per row, per item cost, a percentage and per weight unit
