Description

Y15ZR Vector Logo Free Download

The Y15ZR is a new generation cub. Completely different from any moped that any manufacturer has ever produced before.

The engine is smooth, the throttle is soft enough to see the RPM climb up and the speed climb. Only the maximum speed is not as expected. I'm 177cm tall with a weight of 73kg and the highest speed recorded was 131km/h on a straight, flat track without bending over.

Create using Adobe Illustrator CC 2020
