Description

YITH WooCommerce Customize My Account Page V4.6.0 WP Plugin Free Download

We go and add another plugin to the list of redesigned ones that make the difference: this was the time of YITH WooCommerce Customize My Account, a plugin that allows configuring and customizing the WooCommerce My Account page in an advanced way. My Account is the page users access to edit their profile, keep track of their orders, manage payment methods and shipping addresses, download digital products, etc.

It is a vital section of any e-commerce site that can improve the user experience (by inserting, for example, instructions, tutorials, FAQs, or information related to customer care or support service), to promote products and offers, or to encourage customers to purchase. How? Well, by adding a discount coupon, promotions, texts, and compelling images, for example.

YITH WooCommerce Customize My Account allows editing and customizing My account default pages (Dashboard, User profile, payment methods...) and creating and adding unlimited pages. You can insert content in an advanced way using a WYSIWYG editor, which also supports any type of WordPress and WooCommerce shortcode.

From version 3.0, we have added "banners," graphic boxes that can be inserted with just one click and, thanks to the integration with our plugins Wishlist, Gift Cards, and Points & Rewards, you can offer your users an overview on gift cards they own, points collected on your shop, etc.

Let's see what you can find from version 3.0 of our YITH WooCommerce Customize My Account:

What the plugin does:

Customize your customers' "My Account" page with personalized sections for product promotion, special offers, additional content, etc.

How you can benefit from it:

Add an unlimited number of menu entries in the My Account page, visible to your users, and choose what the content will be: instructions, coupons, surveys, downloadable files, video tutorials, news, notifications etc...

Promote products and show messages related to promotions and discount codes right from the My Account page, one of the most visited areas

of your website;

Create sections with reserved contents that are visible to specific user roles only;

Choose and customize the layout of the My Account page so to make it more usable and modern;

Edit label, content, and position of the default WooCommerce sections (Dashboard, Orders, etc.)

Let users load their own custom profile avatar.

A powerful tool to use the My Account page as a marketing tool and improve the customer experience

My Account page is one of the most visited sections of an e-commerce site. Users access their profile section on a regular basis to monitor orders, edit their personal information and payment methods, and so on.

For this reason, it is essential to both offer a usable area – that is built so that users can easily find the information they're looking for – and to take advantage of this section by adding custom contents, promotions, and information that can help you loyalize your users and push them to buy.

YITH WooCommerce Customize My Account Page allows you to edit the default WooCommerce sections and to add custom sections where you can add any kind of content: texts, images, videos, downloadable files, discount codes, etc. You will be able to promote special offers, products and choose whether to show the contents to all users or only to those with a certain role.

If you want to strengthen the My Account page and get the best out of it, our plugin is the solution you've been looking for.

Choose the layout of the My Account page:

Horizontal or vertical menu? Modern, classic, or minimal style? Choose the position of the menu (vertical, on the right, on the left, or horizontal) and which design suits your shop best. Customize colors, spacing, and icons and make it perfect for your design requirements.

Edit the default WooCommerce endpoints

Do you want to edit the text or the order of WooCommerce endpoints? Add custom content into your users' dashboards or add a custom icon next to the endpoint? This plugin is the only solution that allows you to apply any sort of modification to the endpoints without having to dive into the code of your website.

Create unlimited custom endpoints

Do you want to add a new page in My Account with assembling instructions and video tutorials? Create a page with FAQs, links to your policies, and Customer Care contact channels? Or maybe create a page to advertize a product or a service and encourage users to contact you? Create an unlimited number of endpoints and choose the contents to add in it through the visual editor.
