  - + New: pricing editor in admin area
  - + New: custom user search (profile fields)
  - + Added unban cli command (./yii user/unban )
  - + Added dark mode in default theme (auto, always light, always dark, or user defined)
  - + Added settings component events override (get/set/remove)
  - + Added multiselect profile field type
  - + Added search feature in admin area (header)
  - + Added language switcher popup
  - + Added automatic timezone detection by IP
  - + Admin area page: delete photo thumbnails (content/cache)
  - + Added admin option: restrict incoming likes page for non-premium users
  - + Added admin option: limit photo uploads per user
  - + Added admin option: hide/blur custom profile fields for guests
  - + Added admin option: narrow down messages listing in admin area (active users only; reported users only)
  - \* Stripe new SDK
  - \* PayPal new SDK
  - \* Removed IpStack integration in favour of <https://freegeoip.app/> (free & keyless)
  - \* Theme visual updates and fixes
  - \* Fixed: glide library uses invalid temporary directory on some hosting providers ( <https://github.com/theiphleague/glide/issues/186>)
  - \* Better PHP 8 support
  - \* Updated dependencies (Yii 2.0.40, payment SDK and others)
  - \* Photo upload form update
  - \* Reduced CSS file size
  - \* Misc fixes and improvements
  - \* Updated geodata (countries and cities translations)
  - IMPORTANT: removed Fortumo SDK (due to its broken Web SDK)
  - IMPORTANT: removed youdate-dark theme (default theme now supports auto/light/dark modes)
